

# Open seminar week on EMERGING CHALLENGES IN EDUCATION

Driven largely by new technologies, the world is experiencing wide-ranging social, economic, and political transformations. The speed, intensity and reach of changes are unprecedented, affecting most aspects of our lives, including education. In education, major challenges have emerged at the level not only of policy and governance but also with learning, teaching, and assessment. In this series of open seminars, Professor Fazal Rizvi will hold critical conversations with a range of scholars at the University of Turku.

**5 Days**  
**5 Challenges**  
**5 Discussions**
