

Turku School of Economics		Doctoral Program Learning Goals and Objectives, 2018	
SCIENTIFIC KNOWLEDGE AND EXPERTISE	<b>1</b>	<b><i>Our graduates possess the scientific knowledge and skills needed to contribute to the society in demanding expert roles.</i></b>	
	1.1	Our graduates possess in-depth knowledge on the theories, research approaches, and body of literature related to their areas of specialization.	
	1.2	Our graduates are able to follow the development of their discipline in relevant scientific forums.	
SCIENTIFIC THINKING	<b>2</b>	<b><i>Our graduates are able to contribute to international academic research in their areas of specialization</i></b>	
	2.1	Our graduates are able to design and conduct research independently and to produce scientific contributions publishable in refereed international journals.	
	2.2	Our graduates are able to apply scientific methods to solve research problems relevant for their areas of specialization.	
INTERACTION SKILLS	<b>3</b>	<b><i>Our graduates are able to participate in international academic discussions and interact with the research community and society.</i></b>	
	3.1	Our graduates are able to communicate their research for international academic and practitioner audiences.	
	3.2	Our graduates are able to give constructive feedback on academic research.	
RESEARCH ETHICS AND RESPONSIBILITY	<b>4</b>	<b><i>Our graduates are responsible researchers and aware of the societal implications of their research.</i></b>	
	4.1	Our graduates follow ethical principles of research.	
	4.2	Our graduates are able to evaluate critically the implications of their research for business, economy, and society.
